Subject: building recommendations

Tere, I have reviewed the bid packet and the specs for the renovations at the township hall and would recommend we use the low bidder and also include alternate option #1 at a minimum so we can complete the front of the building and budget for the remainder alternate option #2 next year if the budget doesn't allow for it all this year. I would assume that the cost might increase if the project is broken up but that's just a guess. I would like to see the complete building done at one time but understand if that isn't possible. I will be at the board meeting 08/21/2017 5:30pm to address any questions or concerns. Please forward an invite for the board members to review the plans prior to the meeting so we're all informed on the options. Thanks Matt
